STEVEN ZAMORANO

SUMMARY PROFILE

Self-motivated .NET Developer experienced in delivering high quality results individually and cooperatively with business and systems stakeholders. Detail oriented and pride in 100% client satisfaction. Motivated and energetic developer who takes initiative, enjoys finding solutions to a varying number of challenges.

TECHNICAL SKILLS AND CERTIFICATIONS

- AWS Certified Cloud Practitioner and Microsoft Certified: Azure Fundamentals
- C#, MVC, ASP.NET Web API, Postman
- .NET, Angular, Bootstrap, .NET Core
- HTML5, CSS3, Javascript, TypeScript
- SQL, LINQ, Entity Framework, jQuery, Git
- Microsoft Visual Studio, Microsoft Office, Visual Studio Code
- Knowledge of .NET Framework and object-oriented programming
- Knowledge of basic Agile Scrum methodologies
- Experience debugging within an Integrated Development Environment

EXPERIENCE

Boeing via Tata Consultancy Services, Remote – .NET Developer

NOVEMBER 2021 – JUNE 2024

- Resolved bugs and technical debt items for the 3DX-IVT team's suite of applications including IVT-Services
- Refactored and resolved Coverity findings in .NET, after scans reported findings in the code
- Created pipelines in Azure DevOps to solve the current manual process of checking in code, scanning code for vulnerabilities, defects, and quality, and storing builds that need to be reused within the same project or in other projects altogether

Freelance Developer, Charlotte, NC – .NET Developer

APRIL 2020 – OCTOBER 2021

- Added API controllers and endpoints needed for applications.
- Make HTTP requests with Angular HTTP client service to fetch data from the API

- Used DTOs and mapped DTOs to entities with AutoMapper to send only the necessary data between the API and client
- Used Angular structural directives to conditionally display elements on a page
- Implemented Angular routing solution to navigate between different components, and added route guards to prevent access to unauthorized users
- Implemented server-side and client-side validation to the registration forms
- Implemented 3rd-party photo gallery into application

Velocitor Solutions, Charlotte, NC – *.NET Developer*

JANUARY 2020 – MARCH 2020

- Added some fields to the Top Violations Side Panel report in the V-Track application using Handlebars.js, JavaScript, and the data received from the stored procedure
- Tracked down bug on the Vehicle Alerts Page that was not displaying alerts when selected under Parent Owner

Wells Fargo via Collabera, Charlotte, NC – *.NET Developer*

MARCH 2018 – JANUARY 2020

- Added a report of unsent/blocked emailed recipients to the confirmation emails sent to the working party on all email sent from a warroom within the Eastdil Secured Investor application, it consists of a table listing all marketing list contacts listed as Do Not Solicit.
- Worked on the FIMP UI redesign, which is a Wells Fargo website, where we were given the static HTML and CSS and had to implement it into a MVC design pattern application, which can be found here <https://fixedincomestrategy.wellsfargo.com>
- Added labels to email and password fields, added ADA aria-required = 'true' to these fields, made them required using jQuery by adding a simple visual indication to the user when they are left blank.
- Added input validation for profile entry logging to the Eastdil Secured Investor application, which recorded a profile entry failure due to a bad email address, invalid characters, or invalid input length by adding a row to the tblPPALogging table in the database.
- Added authorization failure logging to the Eastdil Secured Investor application, which recorded a warroom access failure due to incorrect credentials by adding a row to the tblPPALogging table in the database.
- Resolved security vulnerabilities found in our web applications by adding the appropriate headers to the web config.

Coder Foundry Boot Camp Program, Kernersville, NC – *Junior Full-Stack .NET Developer*

JULY 2017 – DECEMBER 2017

- Created a personal portfolio and blog website using C#, MVC5 and JavaScript.
- Created a fully functional MVC bug tracker web application, from scratch, implementing enhanced security and file uploading features.
- Created a fully functional financial portal web application using .NET MVC framework. Composed dynamic front-end design using partial views and AJAX.

Wells Fargo via Apex Systems, Winston-Salem, NC – *Systems Analyst*

MARCH 2017 – JULY 2017

- Analyst on the Wholesale Access Remediation Project, which was a deep-dive assessment of high risk, transactional applications used within the Wholesale Identity & Access Management line of business.
- Conducted meetings with application owners and delegates collecting information for Wells Fargo Audit Services on the mandated list of applications.
- Analyzed data and the application user lists provided looking for excess access, toxic combinations, and separation of duties, and massaged this data before it being loaded into the database.

Sears Home Services, Greensboro, NC – *Outside Sales Representative*

JANUARY 2017 – MARCH 2017

- Sears Home Improvement Products and Services, a member of the Sears Holdings Corporation (NASDAQ: SHLD) family of companies, is one of America's largest home improvement companies for siding and windows installation with operations in 45 states. Our products include siding, custom manufactured and installed windows, custom home entry doors, kitchen remodeling, custom cabinet refacing and Heating Ventilation and Air Conditioning (HVAC)
- Met with clients giving home presentations throughout the sales territory.

nscglobal, High Point, NC – *Field Engineer II*

OCTOBER 2015 – JANUARY 2017

- Performed data migration, re-imaging, and deployment of new corporate computers to new employees and employees experiencing significant issues
- Always followed up with my customers to make sure their issues were resolved
- Received high marks on all customer satisfaction surveys

BB&T, Winston-Salem, NC – *Server Engineer*

SEPTEMBER 2014 – SEPTEMBER 2015

- Coordinate with offshore and local teams throughout the Server 2003 Upgrade Project
- Weekly air travel covering BB&T's footprint throughout the US
- Handle the tasks of installing, configuring, and replacing hardware servers at bank branches
- Provided onboarding training to new hires
- Collaborated with market leaders to facilitate the process for branch employees

Fidelity Investments, Smithfield, RI – *Associate Systems Analyst*

JANUARY 2013 – NOVEMBER 2013

- Collaborated on a daily basis with developers and analysts in an Agile environment working toward completing and clarifying our objectives, requirements, and documentation

- Facilitated meetings with developers, analysts, and senior management to define team goals for project iterations and sprints, to demo applications on projects with clients and stakeholders
- Edited web services for CRD Number Integration with World Class project
- Using SQL gathered usage information on the current version of Mobile World Class application
- Wrote system design documentation for Consolidation of Data Feeds Project, with the objective of reducing redundancy and maintenance operations cost
- Completed Fidelity Investments Leap Training Program

Fidelity Investments, Raleigh, NC – *Technical Intern*

SUMMER 2012

- Provided essential requirements gathering on the UI design of all available accounts to customers on Fidelity.com
- Performed in depth analysis for the Accounts Opening team that delivers the conditions which prompts the features used in the UI

EDUCATION

University of North Carolina, Charlotte, NC – *Bachelor of Science, Business Administration*

DECEMBER 2012

Major: Management Information Systems

Major: Marketing

VOLUNTEER EXPERIENCE

Kramden Institute Inc.

Volunteered to help refurbish donated PCs, laptops, and peripherals and award them to economically disadvantaged students.
